

CY 2022 Greenhouse Gas Emissions

Established Baseline

STS Systems Support, LLC (SSS) measured and established a baseline of our greenhouse gas emissions (GHG) for Calendar Year 2022 for all facilities leased and controlled by the company.

SSS' GHG emissions report provides measurement of our Scope 1 and Scope 2 emissions, as well as our Scope 3 emissions for CY 2022. SSS attests that the Scope 1, 2 and 3 GHG emissions were calculated in accordance with the GHG Protocol Corporate Accounting and Reporting Standard.

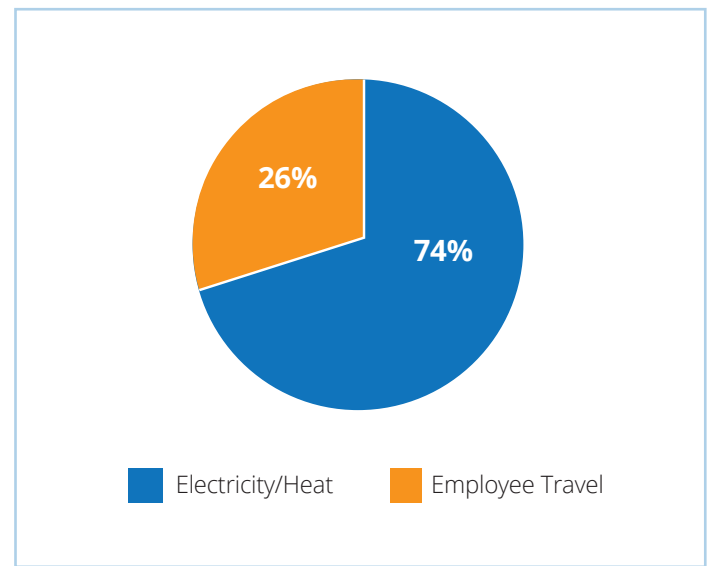

In calendar year 2022, SSS' Scope 1 and 2 emissions measured approximately 4.00 metric tons CO₂e. Its Scope 3 emissions measured approximately 1.54 metric tons CO₂e. The entirety of SSS' emissions are from the electricity used in the facilities we lease, which is commercial office space, and from employee business travel and commuting.

Reduction Targets

SSS is committed to further reduce our greenhouse gas emissions and our impact on the climate and will establish annual reduction targets beginning in 2023. We believe that establishing and meeting these short and mid-term goals will enable us to achieve a reduction in our emissions to net-zero by or before 2030.
